Brief

Create a new masterplan for a 26-hectare mixed-use development that combines commercial space, a retirement village, community facilities, and more.

Breathing new life into a 26-hectare space

We were engaged to re-design a 26-hectare portion of the masterplan that provides a mixed-use village centre and forms a gateway into the new community. Our thoughtful, strategic masterplan will deliver 2,000 new homes.

The plan includes a commercial core, retirement village, and community facilities such as a medical centre and childcare. We have provided a choice of housing to create a diverse community, with apartments, houses, villas, and high-quality landscaped spaces for Taupō's new neighbourhood centre — a hub of residential and commercial activity.
